yassine raddaoui

Summary

Motivated Computer Engineering graduate with a Bachelor's in Computer Science, specializing in full-stack development(Java/Angular). **Eager to bring value to a forward-thinking development team through both technical expertise and a collaborative mindset.**

Education

TEK-UP Private University of Technologies, Engineering Degree — Sept. 2022 to May 2025

- **Specialty:** Software Engineering

Faculty of Sciences of Sfax, Bachelor's Degree — Sept. 2019 to May 2022

- **Specialty:** Software Engineering

Experience

Be Wireless Solutions, – Full-Stack Developer Intern — Hybrid, Feb 2025 to Present

- Spearheaded the development of a Visual Test Case Editor—an Angular + Spring Boot platform enabling QA teams to automate test workflows without writing code.
- Designed real-time SSE-based log streaming and secure role-based access with Keycloak, significantly improving testing turnaround times.
- **Technologies:** Angular, Spring Boot, Keycloak, Selenium, CI/CD, PostgreSQL, Docker, Real-Time Data (SSE),Git

Deepvolt, Full Stack Developer, Intern — Hybrid, July to Sept 2024, 2 months

- Developed and documented RESTful APIs to support an AI-powered EV infrastructure platform, collaborating closely with cross-functional teams in Scrum sprints.
- Integrated Angular frontend with backend services.
- **Technologies:** ExpressJs, PostgreSQL, TypeScript, Angular , Agile (Scrum),Git, Jira ,AWS.

DAFIA Company, Java Developer, Intern — Online, July to Sept 2023, 2 months

- Built secure backend services for a budgeting tool, applying Spring Boot and PostgreSQL best practices.
- Practiced Agile development and maintained robust code versioning via GitLab CI/CD pipelines.
- **Technologies:** Java, PostgreSQL, UML, Spring Boot, Git/Gitlab, Jira,SQL.

CPG, Full Stack Developer, Internship — Hybrid, Jan to May 2022, 5 months

- Designed and developed an application to automate the hiring process.
- **Technologies:** JAVA, MySQL, Spring Boot, Spring Security, Spring DATA JPA, Angular.

Skills

Languages	Java, TypeScript, JavaScript,C , SQL
Frameworks	Spring Boot, Angular, ExpressJS, NgRx, Spring Data JPA, Spring Security, JUnit, Mockito
DevOps & Tools	Docker, Git, GitHub, GitHub Actions, IntelliJ, Eclipse, VSCode, Jira

Databases PostgreSQL, MySQL

Projets

Online Banking Application (Microservices) 2024

- Built a distributed system using Spring Cloud, Keycloak, RabbitMQ, and Docker Compose with real-time metrics via Prometheus + Grafana.
- **Technologies :** SpringBoot , Keycloak , PostgreSQL, Docker ,RESTful APIs

Online Carpooling Application 2024

- Design and development of an online carpooling application.
- **Technologies :** SpringBoot , Angular , PostgreSQL, Uml ,Jira ,Scrum ,RESTful APIs

Online Recruitment Application 2024

- Implemented NgRx state management and RESTful APIs for a robust recruiter-admin-candidate platform.
- **Technologies :** SpringBoot , Angular , NgRx ,django, PostgreSQL, Uml ,Jira ,Scrum

Certifications

Oracle Certified Associate, Java SE 8 Programmer
Oracle Certified Professional: Java SE 17 Developer
EF SET Certifcate C2
