AMENI MHAMDI

QA Automation Engineer | ISTQB® & A4Q Certified

Amenimhamdy@yahoo.com +216 52 120 300 Ariana, Tunisia My LinkdeIn

SUMMARY

ISTQB v4.0 *and* ***A4Q Selenium*** *certified, I specialize in functional test automation (Selenium, Cucumber, Java) in the Smart Metering sector. My expertise lies in ensuring the quality, reliability and stability of systems, delivering results in line with project requirements and actively contributing to their success.*

TECHNICAL SKILLS

Automation Tools
Selenium, Cucumber.

API Tools
Swagger, SoapUI/ReadyAPI, Postman.

Web Services
REST.

Databases
SQL (MySQL, SQL Server), NoSQL (Firebase).

Web Frameworks
Angular, Bootstrap.

Test Management
Jenkins, Azure DevOps.

Messaging Systems
Kafka, ActiveMQ.

Version Control
GitHub, GitLab, Git.

IDEs
Eclipse, VS Code, Visual Studio, Android Studio.

Java Frameworks
JEE, Spring Boot, Hibernate, JSP.

Bug Tracking
Jira, Xray.

Data Analysis & Monitoring
Kibana, Elasticsearch.

Methodologies
Agile/Scrum, BDD.

Operating Systems
Linux, Windows.

Design Tools
Canva, Photoshop, Figma.

Programming Languages
Java, JavaScript, Kotlin, Python.

Documentation
Confluence Wiki, TestLink, Squash TM.

Data Formats
JSON.

Mobile Development
Android, Dart, Jetpack Compose, Flutter.

Modeling Language
UML.

WORK EXPERIENCE

QA Automation Engineer
Sagemcom Software & Technologies | Aug 2024 – Present

- Developed and maintained automated test suites using Selenium and Java for smart metering applications, which reduced testing time by 30% and improved software release cycles by 2 weeks.
- Review scripts and advise on high quality testing.
- Scaled Sanity test coverage to 1000+ test cases, achieving 100% critical path coverage for Smart Metering apps.
- Improve test processes and adopt new technologies to optimize efficiency.
- Participate in test planning and execution during software updates.
- Implement database access and manage SQL queries.
- Automate virtual machine management with Linux commands.
- Automate message retrieval from messaging systems to ensure reliable data flow.
- Participate in Agile validation team progress meetings.
- Write and prepare test results reports to assess product quality.
- Perform non-regression tests for each new version to maintain stability.
- Manage bugs on Jira by reporting, tracking and resolving them.
- Analyze bugs in collaboration with the development team.
- Monitor corrections to ensure rapid and effective problem resolution.
- Guarantee the quality of automated tests with Sonar for static analysis and measurement of quality indicators.

Tools: Selenium, Cucumber, Postman, Jira, Xray, Confluence, Git, Kibana, Elasticsearch, PgAdmin, mRemoteNG, ActiveMQ, SonarQube, Kafka and Serenity BDD.
Programming language: Java.

QA Automation Engineer
Freelance | Sept 2023 – Jul 2024

- Co-developed automated test solutions for web apps using Selenium WebDriver & TestNG, tailored to client needs.
- Built modular test scripts with a focus on core business logic and user workflows, ensuring maintainability.
- Managed test cases in TestLink, adapting to changing requirements and acceptance criteria.
- Used Xray to link tests to user stories, improving traceability and team alignment.
- Reported and tracked bugs in Jira, working with dev teams to prioritize and resolve issues.
- Automated regression testing to speed up validation cycles and reduce manual checks.
- Shared clear test reports with stakeholders, covering progress, risks, and blockers.

Tools: Selenium, Cucumber, Jira, Xray, Git, TestLink and TestNG.
Programming language: Java.

INTERNSHIPS

Graduation internship-customized TV launcher Tunisia, Tunis
Sagemcom Software & Technologies | Feb-Jul 2023

- Designed a modern UI/UX interface for an Android launcher dedicated to the Virtual Storytelling Box.
- Developed the software architecture following the MVVM pattern for better maintainability.
- Implemented dynamic interfaces using Jetpack Compose, tailored to different user profiles.
- Created mockups with Figma and interactive prototypes with Canva.
- Tested REST APIs via Postman and documented technical results.
- Collaborated with the team using Jira for task tracking and GitLab for version control.
- Integrated personalized recommendations to enhance user experience.
- Incorporated SonarQube into the pipeline to analyze and improve code quality.

Tools: Jetpack Compose, Figma, UML, MVVM, Canva, Box TV, Photoshop, Jira Software, Postman, REST API, GitLab, LaTeX, Android Studio and SonarQube.
Programming Language: Kotlin.

Summer Internship – Mobile Pedometer App Tunisia, Sousse
Satoripop | Jun-Aug 2022

- Designed and developed a pedometer app with full physical activity tracking.
- Implemented core features: step counting**,** distance calculation, speed, and calories burned.
- Integrated Firebase for user data management and synchronization.
- Adopted the MVC architecture for clear component separation.
- Connected the app to REST APIs to enhance tracking data.
- Used GitHub for version control and team collaboration.
- Incorporated SonarQube into the pipeline to analyze and improve code quality.

Tools: Flutter, Firebase, MVC, REST API and GitHub.
Programming Language: Dart.

EDUCATION

National Engineering Diploma in Telecommunications 2020 – 2023
National School of Electronics and Telecommunications Tunisia, Sfax

Bachelor's in IT & Communication Sciences 2017 – 2020
Higher Institute of Computer Science Tunisia, Medenine

Bachelor's in IT & Communication Sciences 2016 – 2017
Higher Institute of Computer Science and Mathematics Tunisia, Monastir

Baccalaureate Diploma in Computer Science 2016
Technical High School Tunisia, Medenine

CERTIFICATES

- ISTQB® Certified Tester Foundation Level (CTFL) – Syllabus v4.0
- Object-Oriented Programming in Java
- Python Essentials 1 (Cisco)
- A4Q Certified Selenium Tester Foundation (A4Q CST)
- Git Fundamentals

LANGUAGE SKILLS
