## PROFILE

QA Automation Engineer passionate about software quality, test automation frameworks, and BDD testing.

## EXPERIENCE

- **QA Automation Software Engineer (Summer Internship Project)** *Ariana, Tunisia*
  *TEK-UP University* June – September 2025
  - Design and development of a collaborative project management web application using **Spring Boot** and **Angular**.
  - Definition and implementation of an appropriate **test strategy**, improving defect detection rate by over 35 %.
  - Implementation and execution of Spring Boot unit tests using **JUnit 5** and **Mockito**.
  - API integration testing using **Postman**.
  - Analysis, design, implementation, and execution of functional tests using **Selenium WebDriver**, **JUnit**, and **Cucumber**, reducing manual testing efforts by 40 %.
  - Setup of **BDD scenarios aligned with business requirements**, ensuring 90 % coverage of critical user journeys.
  - Implementation of a Jenkins CI/CD pipeline integrating **SonarQube**, **Snyk** (SAST/SCA), **Docker image scanning**, **multi-service build and push**, **automated tests**, and **automated deployment via Docker Compose**.

- **Full-Stack Developer (Final Year Project)** *Ben Arous, Tunisia*
  *SAGEMCOM* January – June 2023
  - Design and development of a traceability web application using **Express.js** and **Angular**.
  - Integration of authentication using **LDAP/Apache**.
  - Implementation of a local **SSL certificate** to enhance communication security.
  - Strengthened my ability to collaborate effectively within an agile team.
  - Comprehensive technical documentation of projects using **Compodoc**, generating automated documentation via a custom script.

## PROJECTS

- **Professional Tracking Web Application: Doctors, Coaches, and Lawyers** *February – May 2025*
  *Tools: Angular 17, Express.js, and MongoDB*
  - Responsible for the design and development of the **Coach** role within the application.
  - Implementation of authentication and authorization mechanisms to secure access to features.
  - Access and usage of the professionals' dashboard.
  - Management of patients and their appointments, including follow-up through personalized health programs.
  - Monitoring patient progress based on defined objectives.
  - Automation of real-time reminders using **CRON jobs**.
  - Enhancement of user experience, reducing booking time by 40%.

## Education

- **TEK-UP** *2023 – 2026*
  *Engineering Degree in Software Engineering* Tunis, Tunisia
- **ISIG Kairouan** *2020 – 2023*
  *National Bachelor's Degree in Computer Science* Kairouan, Tunisia

## Skills

- **Languages:** Java, Python (currently preparing for the PCAP™ – PCAP-31-03 certification)
- **Testing and Automation:** Selenium WebDriver, Cucumber, JUnit, TestNG, Postman, Rest Assured
- **Methodologies:** Agile – Scrum, BDD, TDD
- **Defect Management and Tracking:** Jira, Xray
- **Development and Frameworks:** Spring Boot, Angular, Bootstrap, Express.js
- **Databases:** PostgreSQL, MySQL, MongoDB
- **CI/CD and Quality:** Jenkins, GitLab, Git, SonarQube, Snyk (SAST/SCA)
- **Modeling:** UML
- **Containerization:** Docker
- **Environments and IDEs:** IntelliJ IDEA, Eclipse, Spring Tool Suite (STS), Visual Studio Code
